DENKO

Nickle Screens

QUALITY, PRECISION AND RELIABILITY FOR THE SUGAR INDUSTRY

Denko is the manufacturer of perforated metal products. We have been manufacturing high quality screens from our European factories for more than 40 years and have an extensive knowledge of the requirements and demands of the sugar industry. These three factors combined make Denko a competent and reliable partner for sugar processing screens. We use the latest technological manufacturing equipment to produce reliable and durable products at competitive prices for use within the sugar industry.

Our goal is to provide you, our customer, with a high quality product designed to meet your large volume processing requirements. You can benefit from the high service level and expertise of our skilled sales personnel, who will assist you in finding the optimal solution to your needs.

Denko

This Publication includes the wide Range of Nickle Screens that Denko offers.

“Standard” Screens

Denko Top quality Screens are an expertise in electroforming the heart of the screen making process. The Denko Standard screens are available in wide range of slot size, thickness and open area to suit the sugar technologist’s need.

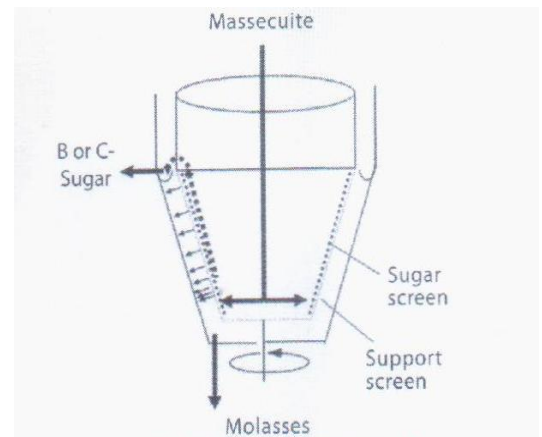

Technical Specification:

Denko “Standard” Screen	Slot Type	Slot Size mm	Open Area	Thickness mm
	40/10	0.04 x 2.09	5.2%	0.30mm - 0.33mm
	40/10	0.06 x 2.11	8%	0.29mm - 0.32mm
	40/10	0.09 x 2.14	11%	0.28mm - 0.31mm

Other sizes available on request

Special Features:

- Higher screen thickness ensures higher screen life.
- Thickness of chromium plating 10-12 microns. More thickness ensures more screen life.
- Hardness of chromium: 800-1000 Vickers, thus wear is less.
- Reduction in slot size reduces final molasses purity and increases sugar yield.
- More open area hence more output per cycle.
